Accurate and Intelligent

Improve operations and save money

Intelis™ gFlow
Solid-state AMI gas meter

LOWER OPERATING COSTS AND INCREASE REVENUE

Intelis™ gFlow is an accurate, durable and reliable meter that helps you better manage your distribution system and improve cash flow. Actionable data provide insights into grid operations and helps reduce loss, lower operating costs and improve safety.

Increase Revenue and Reduce Loss

- » High accuracy ensures accurate billing
- » Multiple payment options improve cash flow
- » Local alerts help detect theft including meter removal
- » AMR backup for hard-to-reach locations or poor cellular coverage

Improve employee and customer safety

- » Advanced leak detection
- » Real-time alarms for critical events
- » Remote shut-off valve and overflow control

Lower operating and maintenance costs

- » Diagnostic solutions to help you quickly identify and resolve problems
- » Durable and corrosion resistant for harsh conditions
- » Small footprint and easy to install
- » Advanced battery management gives you valuable insights to optimize maintenance

Improve customer satisfaction

- » Wide range of payment options, including prepayment
- » Access to consumption data via text, mobile applications or email
- » Easy menu interface

Support carbon reduction goals

- » Reduce losses to improve your carbon footprint
- » Supports a 20% hydrogen mixture to improve your carbon footprint
- » Provide consumption data to customers to help use gas more efficiently

ITRON END-TO-END SOLUTION

Gain valuable insight into distribution system operations

Combine Intelis™ gFlow with NB-IoT communication and Temetra to better manage your network:

- » Ensures quality data with reliable two-way communication
- » Monitor the distribution system with predictive maintenance and early failure detection
- » Reliable and proven solution in multiple installations
- » Improve safety with leak detection and overflow control

Why Solid-State Metering?

Solid-state ultrasonic meters (ultrasonic) are accurate, durable, safe, and deliver a positive ROI.

- » Compatible with Advanced Metering Infrastructure (AMI)
- » Perform extremely well in harsh environments
- » Reduce costs - no moving parts means less wear and tear
- » Better manage the gas delivery system
